891 polytypes 33 y axis 27 x axis 17 z axis	The central, positive and negative tiers are qualia assemblies of spirit shared across increasingly complex conglomerations of all qualia in general. Ethereal qualia differ from the other archetypes in that, predicative to forma, their qualia enable fractal assemblies to formalize.			The central, positive and negative tiers are qualia assemblies of potentia shared across increasingly complex conglomerations of all qualia in general. Ethereal qualia differ from the other archetypes in that, predicative to forma, their qualia enable fractal assemblies to formalize.			The central, positive and negative tiers are qualia assemblies of spirit shared across increasingly complex conglomerations of all qualia in general. Ethereal qualia differ from the other archetypes in that, predicative to forma, their qualia enable fractal assemblies to formalize.			The + (positive) tiers are qualia assemblies of forms shared by increasingly complex conglomerations of qualia in general. The = (neutral) tier is the central form platform of human experience. The - (negative) tiers are qualia assemblies of form below the central threshold.			The + (positive) tiers are qualia assemblies of matter by increasingly complex conglomerations of groups. The = (neutral) tier is the central material platform of human experience. The - (negative) tiers are qualia assemblies of sub-material configurations below the central threshold.			The + (positive) tiers are qualia assemblies of organismism shared by increasingly complex conglomerations of groups. The = (neutral) tier is the central organismism of the organism. The - (negative) tiers are qualia assemblies of organismism within organisms.			The + (positive) tiers are qualia assemblies of psychic architectures and processes shared by increasingly complex conglomerations of psyches. The = (neutral) tier is the central psychic architecture and process of the organism. The - (negative) tiers are qualia assemblies of architectures and process within a single psyche.			The + (positive) tiers are qualia assemblies of meaning making shared by increasingly complex conglomerations of groups. The = (neutral) tier is the central meaning making of the organism. The - (negative) tiers are qualia assemblies of meaning making within organisms.			The + (positive) tiers are qualia assemblies of transformative force shared by increasingly complex conglomerations of groups. The = (neutral) tier is the central transformative force of the organism. The - (negative) tiers are qualia assemblies of transformative force within organisms.
