

Body and Soul: The Mind of Culture

A TOK Society Sponsored
Communal Dialogos Series at the Stoa
Hosted By Greg Thomas and Gregg Henriques

How can we as humans survive and thrive through a perilous phase shift from a dying civilization to, potentially, an Age of Freedom and Clarity? In 5 events each Monday in February, Greg Thomas and Gregg Henriques explore this liminal inquiry with deep thinkers who will engage in dialogos on themes from physics, biology, psychology, and culture to transcendent values, holistic communication, and a shared “wisdom commons” that exists prior to and beyond the state and the market.

TITLES AND GUESTS

I. From Matter to Life to Mind to Culture, featuring scientists *Stephon Alexander*, Physicist, Brown University and *Brandon Ogbunu*, Evolutionary Biologist, Yale University. **Feb. 1, 2021, 5:30-7:00 pm EST**
